

1. Summarising Notes

Prompt

I am a college student. Can you summarize the following notes in language? Please include the points, important definitions and key concepts in bullet points. I want the summary to be easy to understand for exam preparation.

Notes: Artificial Intelligence (AI) is when machines copy intelligence. AI systems can learn, reason, solve problems and make decisions. AI is used in healthcare, education, transportation and business. Machine Learning is a part of AI that helps systems learn from data without being programmed.

Full AI Response

Summary of Artificial Intelligence

Artificial Intelligence (AI) is when machines do tasks that normally need intelligence.

Here are the main points:

- * AI can learn from information

- * AI can make decisions

- * AI can solve problems

- * AI can reason logically

AI is used in:

- * Healthcare

- * Education

- * Transportation

- * Business

Machine Learning is a branch of AI.

Machine Learning helps computers learn from data without programming.

Important Definition

Artificial Intelligence: When machines copy intelligence.

Key Concept

Machine Learning: A part of AI that enables systems to learn from data automatically.

Why This Prompt Worked

The prompt clearly says:

- * I am a college student

- * The task is to summarize notes

- * The format is bullet points

- * The language level is simple

This helps generate an understandable summary.

2. Generating a Study Plan

Prompt

Create a 7-day study plan for a second-year engineering student preparing for Python Programming exams. Allocate 3 hours per day. Include revision and practice sessions.

Ai Response

7-Day Python Study Plan

Day 1

- * Python Basics (1.5 hrs)

* . Data Types (1 hr)

* Revision (0.5 hr)

Day 2

* Lists, Tuples, Sets, Dictionaries (2 hrs)

* Practice Problems (1 hr)

Day 3

* Functions and Modules (2 hrs)

* Revision (1 hr)

Day 4

* Strings and File Handling (2 hrs)

* Practice Questions (1 hr)

Day 5

* OOP Concepts (2 hrs)

- * Coding Exercises (1 hr)

Day 6

- * Exception Handling (1.5 hrs)

- * Previous Question Papers (1.5 hrs)

Day 7

- * Complete Revision (2 hrs)

- * Mock Test (1 hr)

Why This Prompt Worked

The prompt provides:

- * Duration: 7 days

- * Subject: Python Programming

- * Student level: second-year engineering

- * Daily study time: 3 hours

These details help create an organized plan.

3. Creating Interview Questions

Prompt

Generate 10 beginner- interview questions for a Python Developer role. Include answers in language.

Full AI Response

Python Interview Questions

1. What is Python?

Answer: Python is a level easy-to-learn programming language.

2. What are variables?

Answer: Variables are used to store data values.

3. What is a list?

Answer: A list is a collection of items stored in order.

4. What is a tuple?

Answer: A tuple is an ordered collection that cannot be changed.

5. What is a dictionary?

Answer: A dictionary stores data as key-value pairs.

6. What is a function?

Answer: A function is a block of code that performs a task.

7. What is OOP?

Answer: OOP stands for Object-Oriented Programming.

8. What is inheritance?

Answer: It allows one class to use properties of another class.

9. What is exception handling?

Answer: It helps manage errors during program execution.

10. Why is Python popular?

Answer: Because it is easy to learn, powerful and widely used.

Why This Prompt Worked

The prompt mentions:

- * Number of questions: 10
- * Difficulty level: beginner
- * Job role: Python Developer
- * Need for answers

This produces useful interview preparation material.

4. Writing a Resume Summary

Prompt

Write a resume summary for a second-year Computer Science student who knows Python, Java and SQL and is looking for internship opportunities.

Ai Response

Resume Summary

I am a motivated and detail-oriented second-year Computer Science student with knowledge of Python, Java and SQL. I am passionate about software development and problem-solving. I have analytical and teamwork skills gained through academic projects and practical learning. I am seeking internship opportunities to apply knowledge gain industry experience and contribute to organizational success.

Why This Prompt Worked

The prompt includes:

- * Education level

- * Skills

- * Career objective

This allows generating a personalized and professional resume summary.

5. Creating a Lesson Plan

Prompt

Create a one-hour lesson plan for teaching Python Lists to beginners. Include objectives, activities, examples and assessment.

Full AI Response

Lesson Plan: Python Lists

Duration: 1 Hour

Learning Objectives

Students will:

- * Understand what lists are

- * Create and modify lists

- * Access list elements

Introduction (10 Minutes)

Explain lists, with real-life examples.

Show a sample list:

```
fruits = ["Apple" "Banana" "Mango"]
```

Teaching Activity (20 Minutes)

Explain list creation.

Explain indexing.

Explain adding and removing elements.

Activity (20 Minutes)

Students create:

```
colors = ["Red" "Blue" "Green"]
```

Practice accessing and modifying elements.

Assessment (10 Minutes)

Questions:

1. What is a list?
2. How do you access the element?
3. How do you add an item to a list?

Why This Prompt Worked

The specifies:

* Topic: Python Lists

- * Audience: beginners

- * Duration: 1 hour

- * sections: objectives, activities, examples, assessment

This helps create a complete and structured lesson plan.

These prompts work effectively because they provide instructions, context, target audience and expected output format allowing the AI to generate accurate and useful responses.
